Radinium Access 2.2

SALTO ProAccess SPACE integration into Milestone XProtect®

Next generation keyless access control with a watchful eye.

Radinium Access 2.0 is a Milestone XProtect® MIP Plugin integrating the SALTO ProAccess SPACE system using the full SHIP protocol. XProtect® rule engine and permission system integration, allows per-door opening and closing, access logs, live events and live door status for online doors.

The SVN data-on-card allows access information to be stored on the card, tag, sticker or mobile keys, providing offline locks capabilities.

Offline doors are supported within this integration.

Assigning up to 2 cameras per door, makes it easy to use an Advanced Search using Filters, associated recordings and maps within Milestone XProtect®.

Required:
Milestone XProtect® Express+, Professional+, Expert or Corporate 2021 R1 or higher.
ProAccess SPACE 6 Version 6.4.4.0 or higher recommended.
SALTO SHIP module.
The Milestone XProtect® Access Module is **NOT** required.

Go to https://radinium.com/salto2-0/ for a trial download.

LIVE LOCK STATUS

View live cameras for every Door/Room/Locker with a simple click on the lock name under Lock Status with location on maps (up to 2 cameras per door/room/locker can be assigned).
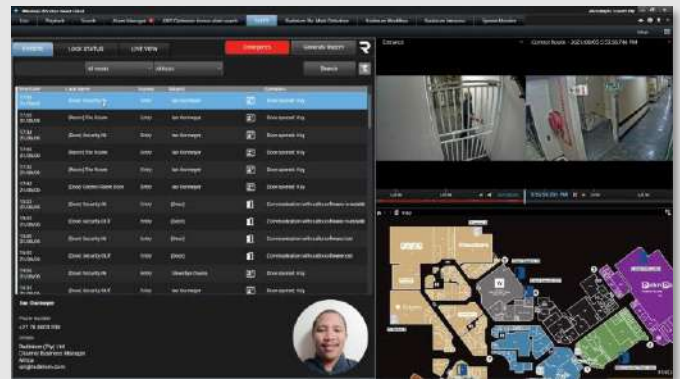

The list show the Lock Name, Open or Closed, Errors and Battery Status.

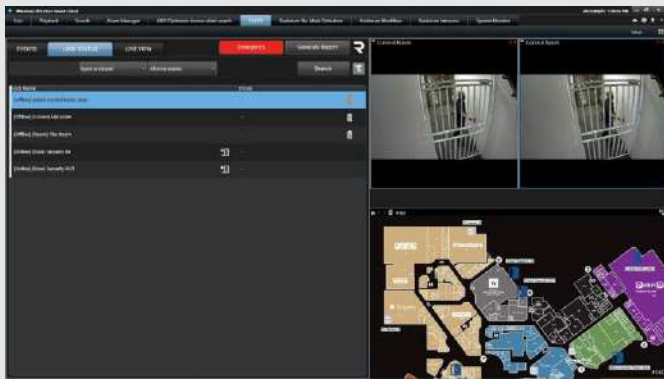

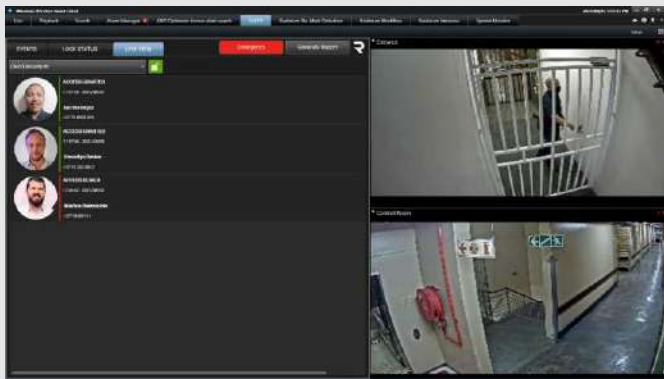

LIVE SALTO EVENTS

View live SALTO events as they happen with Playback, Cardholder details and the location on a map.

SALTO Events are time synchronized with the recorded video.

LIVE VIEW

Select available ONLINE Lock to view live who is coming in or out.

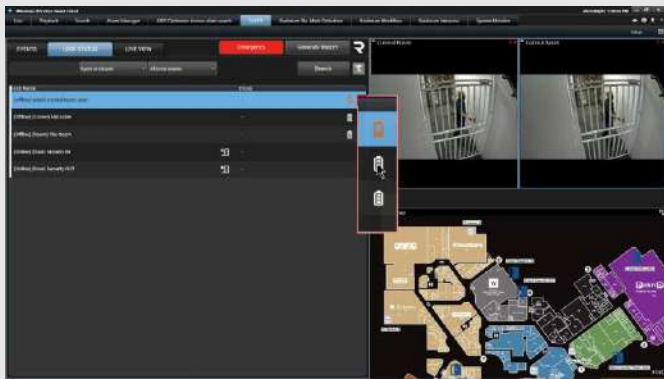

REVIEW & SEARCH EVENTS PER CARDHOLDER

Search Events per Cardholders by Event types and per lock available from SALTO.

Cardholder information available associated with the event.

BATTERY LEVELS

Filter Battery Levels per door under door status. It shows the battery level of offline doors with an icon level indicator.

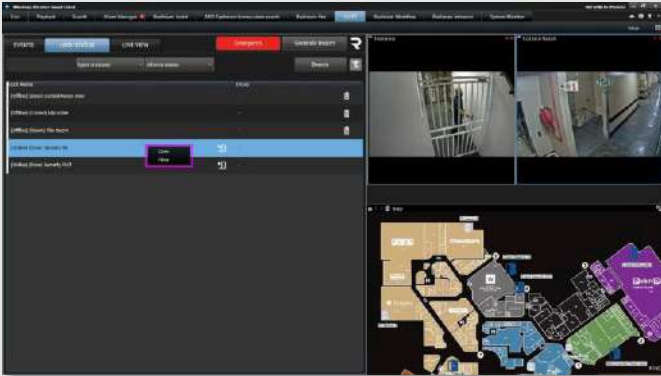

RECORDED EVENTS

Easily view recorded events with playback footage per Lock (ONLINE/OFFLINE), per cardholder or by event type.
